I authorise IIUI to credit my refundable security or any other which amount becomes refundable to me at any stage in the Bank account mentioned above

Applicant's Signature

Product 2k2k (eBio) Initial Abstract of an Idea

Purpose: Design to benefit both technical and non-technical professionals, this real world information will enable developers to develop biometric solutions without compromising the intended security enhancement.

Target Business Audience: BioMetrics User/client Services (Regional/International)

Features:

Developing a common methodology for software developers looking to integrate biometrics (MultiModal Modalities) into their applications

- End user education
- Making applications easier to use via biometrics
- Common UI (User Interface) issues regarding biometrics
- User enrollment problems and solutions
- Client/Server programming issues to consider
- Frequent error conditions and how to handle them
- Audit and event logs issues while addressing privacy

Seamlessly developing biometrics to enhance your existing security

- Template storage and management issues
- Template encryption issues
- Security and integrity of biometric data from source to output
- Potential security threats and solutions to them
- Export restrictions regarding certain biometric implementations

Developing API's (Application Programming Interface)

- Current status of the biometric API's
- How to use and which is best for you?
- API's and implementing a secure system
- API's and non-PC platforms
- Exploring template compatibility
